## 'Bailey' peanut maturity progress in Suffolk, VA

Bailey planted on May 2<sup>nd</sup> and dug on Sep 2<sup>nd</sup> (upper picture) and Sep 12 (bottom picture). The upper color chart is incorrect, but the second indicates well the approximate days till optimum harvest, in this case 10 to 14 days from Sep 12.

Late planted Bailey (June 4<sup>th</sup>) and dug on Sep 2<sup>nd</sup> (upper picture) and Sep 12 (bottom picture). Both color charts are incorrect. Correct it is to expect optimum maturity in approximately 20 to 25 days from Sep 2<sup>nd</sup> for the upper picture and 10 to 15 days from Sep 12 for the bottom picture.
